THE AUTHOR

Linda G. Robbins is a home economist with the Food Markets Analysis Division, Policy Branch, Agriculture Canada, in Ottawa. She works in the area of food consumption and expenditure and nutrition in the Demand and Price Analysis Section.

L'AUTEUR

Linda G. Robbins est une économiste domestique avec la division de l'analyse des marchés agro-alimentaires, direction générale des politiques, Agriculture Canada, à Ottawa. Elle travaille dans les domaines de la consommation et de la nutrition à la sous-section de l'analyse de la demande et des prix.

FOREWORD

Research workers in the field of demand and price analysis spend considerable time and effort assembling data from diverse sources and ensuring that the data are comparable among series, and over time. This publication was prepared to meet the need for a comprehensive and convenient source of data used in analyzing food consumption patterns in Canada.

This handbook presents historical data on the population of Canada, personal income, personal expenditure on consumer goods and services, retail food prices, and supply and disposition balance sheets for a number of food commodities. In addition, selected tables from family expenditure surveys, the United States, the world and the OECD have been included. For the first time, data on the processing and distribution of food, and food industry statistics have also been included.

This publication will be updated periodically; therefore, comments on its usefulness and suggestions for revision are welcome.

H. Migie
Director
Food Markets Analysis Division

AVANT-PROPOS

Dans le domaine de l'analyse de la demande et des prix à la consommation, les chercheurs doivent consacrer beaucoup de temps et déployer des efforts considérables pour rassembler les données de diverses sources et s'assurer qu'elles sont comparable parmi les séries et par rapport au temps. Par conséquent, cette publication a été préparée pour répondre au besoin d'une source complète et commode de données utilisées dans l'analyse des structures de la consommation alimentaire au Canada.

Ce guide présente les données historiques sur la population du Canada, le revenu et les dépenses personnels pour les biens et les services offerts au consommateur, le prix au détail des aliments, ainsi que le bilan d'un certain nombre de denrées. En outre, on a inclu divers tableaux tirés des enquêtes sur les dépenses des familles; les dites enquêtes ont été réalisées aux Etats-Unis, dans les pays membres de l'OCDE et dans les pays en voie de développement.

Cette publication sera mise à jour régulièrement. Vos commentaires et vos suggestions seront appréciés.

H. Migie
Directeur
Division de l'analyse des marchés
agro-alimentaires

ACKNOWLEDGEMENT

The author wishes to express her gratitude to those who assisted in the preparation of this handbook: P. Conway, Statistics Canada; Marie-France Huot, D. Landreville, L. Curtin, A. Marleau, B. Wootton, S. Lafave, D. Orchard, M. Grittner, T. Bow and U. Comeau, Agriculture Canada; K. Presseau, DOMUS Consulting Inc.; and J. Putnam and H. Harp, USDA.

Section VI on Food and Beverage Processing and Retailing was prepared by P. Cooper, Food Processing and Retail Analysis Section, Food Markets Analysis Division, Agriculture Canada.

V. Ressources et utilisation

V.1. Céréales

43. Farine de blé: ressources et utilisation, 1960-1987 93
44. Farine de tourteau de seigle: ressources et utilisation, 1960-1987 94
45. Farine d'avoine: ressources et utilisation, 1960-1987 95
46. Riz: ressources et utilisation, 1960-1987 96
47. Céréales pour le petit déjeuner: ressources et utilisation, 1960-1987 97
48. Total des céréales: ressources et utilisation, 1960-1987 98

V.2. Sucre et sirops

49. Sucre: ressources et utilisation, 1960-1987 101
50. Sucre d'érable: ressources et utilisation, 1960-1987 102
51. Miel: ressources et utilisation, 1960-1987 103
52. Autres sucres et sirops: ressources et utilisation, 1960-1980 104
53. Total du sucre et du sirop: ressources et utilisation, 1960-1987 105

V.3. Légumes à cosses secs et noix

54. Haricots secs: ressources et utilisation, 1960-1987 109
55. Pois secs: ressources et utilisation, 1960-1987 110
56. Arachides: ressources et utilisation, 1960-1987 111
57. Noix: ressources et utilisation, 1960-1987 112
58. Total légumes à cosses secs et noix: ressources et utilisation, 1960-1987 113

V.4. Huiles et corps gras

59. Margarine: ressources et utilisation, 1960-1986 117
60. Graisse et huile vegetale: ressources et utilisation, 1960-1986 118
61. Huile de table: ressources et utilisation, 1960-1986 119
62. Beurre de beurrerie: ressources et utilisation, 1960-1986 120
63. Total huiles et corps gras: ressources et utilisation, 1960-1986 121

V.5. Fruits

64. Tomates fraîches: ressources et utilisation, 1960-1986 125
65. Tomates en conserve: ressources et utilisation, 1960-1986 126
66. Jus de tomate: ressources et utilisation, 1960-1986 127
67. Total pour les tomates: disparition par personne, 1960-1986 128
68. Oranges fraîches: ressources et utilisation, 1960-1986 129
69. Jus d'orange: ressources et utilisation, 1960-1986 130
70. Citrons frais: ressources et utilisation, 1960-1986 131
71. Jus de citron: ressources et utilisation, 1960-1986 132
72. Pamplemousse frais: ressources et utilisation, 1960-1986 133

Page

73. Jus de pamplemousse: ressources et utilisation, 1960-1986 134
74. Total agrumes: ressources et utilisation, 1960-1986 135
75. Pommes fraîches: ressources et utilisation, 1960-1986 136
76. Pommes en conserve: ressources et utilisation, 1960-1986 137
77. Jus de pomme: ressources et utilisation, 1960-1986 138
78. Pommes congelées: ressources et utilisation, 1960-1986 139
79. Pommes sèchées: ressources et utilisation, 1960-1986 140
80. Compote de pommes : ressources et utilisation, 1960-1986 141
81. Garniture de tarte aux pommes: ressources et utilisation, 1960-1986 142
82. Abricots frais: ressources et utilisation, 1960-1986 143
83. Abricots en conserve: ressources et utilisation, 1960-1986 144
84. Bananes fraîches: ressources et utilisation, 1960-1986 145
85. Bleuets frais: ressources et utilisation, 1960-1986 146
86. Cerises fraîches: ressources et utilisation, 1960-1986 147
87. Canneberges fraîches: ressources et utilisation, 1960-1986 148
88. Raisins frais: ressources et utilisation, 1960-1986 149
89. Jus de raisins: ressources et utilisation, 1960-1986 150
90. Melons frais: ressources et utilisation, 1960-1986 151
91. Pêches fraîches: ressources et utilisation, 1960-1986 152
92. Pêches en conserve: ressources et utilisation, 1960-1986 153
93. Poires fraîches: ressources et utilisation, 1960-1986 154
94. Poires en conserve: ressources et utilisation, 1960-1986 155
95. Ananas frais: ressources et utilisation, 1960-1986 156
96. Ananas en conserve: ressources et utilisation, 1960-1986 157
97. Jus d'ananas: ressources et utilisation, 1960-1986 158
98. Prunes fraîches: ressources et utilisation, 1960-1986 159
99. Prunes en conserve: ressources et utilisation, 1960-1986 160
100. Framboises fraîches: ressources et utilisation, 1960-1986 161
101. Framboises congelées: ressources et utilisation, 1960-1986 162
102. Fraises fraîches: ressources et utilisation, 1960-1986 163
103. Fraises congelées: ressources et utilisation, 1960-1986 164
104. Total fruits frais: ressources et utilisation, 1960-1986 165
105. Total fruits en conserve: ressources et utilisation, 1960-1986 166
106. Total fruits congelé: ressources et utilisation, 1960-1986 167
107. Total jus de fruits: ressources et utilisation, 1960-1986 168
108. Total fruits séchés: ressources et utilisation, 1960-1986 169
109. Confitures, gelées, marmelades: ressources et utilisation, 1960-1986 170
110. Total, les autres fruits: ressources et utilisation, 1960-1986 171
111. Total fruits: ressources et utilisation, 1960-1986 172

V.6. Légumes

112. Choux frais: ressources et utilisation, 1960-1986 175
113. Laitue fraîche: ressources et utilisation, 1960-1986 176
114. Asperges fraîches: ressources et utilisation, 1960-1986 177
115. Asperges en conserve: ressources et utilisation, 1960-1986 178
116. Haricots verts et jaunes, frais: ressources et utilisation, 1960-1986 179
117. Haricots verts et jaunes, en conserve: ressources et utilisation, 1960-1986 180
118. Haricots verts et jaunes, congelés: ressources et utilisation, 1960-1986 181
119. Betteraves fraîches: ressources et utilisation, 1960-1986 182
120. Betteraves en conserve: ressources et utilisation, 1960-1986 183
121. Brocoli frais: ressources et utilisation, 1966-1986 184
122. Brocoli congelé: ressources et utilisation, 1962-1986 185
123. Choux de bruxelles frais: ressources et utilisation, 1965-1986 186
124. Choux de bruxelles congelés: ressources et utilisation, 1963-1986 187
125. Carottes fraîches: ressources et utilisation, 1960-1986 188

Page

126. Carottes en conserve: ressources et utilisation, 1960-1986 189
127. Carottes congelées: ressources et utilisation, 1968-1986 190
128. Choux-fleurs frais: ressources et utilisation, 1960-1986 191
129. Choux-fleurs congelés: ressources et utilisation, 1969-1986 192
130. Céleri frais: ressources et utilisation, 1960-1986 193
131. Maïs frais: ressources et utilisation, 1960-1986 194
132. Maïs en conserve: ressources et utilisation, 1960-1986 195
133. Maïs congelé: ressources et utilisation, 1960-1986 196
134. Concombres frais: ressources et utilisation, 1961-1986 197
135. Oignons frais: ressources et utilisation, 1960-1986 198
136. Panais frais: ressources et utilisation, 1960-1986 199
137. Pois frais: ressources et utilisation, 1960-1986 200
138. Pois en conserve: ressources et utilisation, 1960-1986 201
139. Pois congelés: ressources et utilisation, 1960-1986 202
140. Piments frais: ressources et utilisation, 1960-1986 203
141. Radis frais: ressources et utilisation, 1960-1986 204
142. Rutabagas frais: ressources et utilisation, 1960-1986 205
143. Champignons frais: ressources et utilisation, 1960-1986 206
144. Champignons en conserve: ressources et utilisation, 1960-1986 207
145. Total légumes frais: ressources et utilisation, 1960-1986 208
146. Total légumes en conserve: ressources et utilisation, 1960-1964 209
147. Total légumes congelé: ressources et utilisation, 1960-1986 210
148. Total légumes: ressources et utilisation, 1960-1986 211
149. Pommes de terre blanches: ressources et utilisation, 1960-1986 212
150. Pommes de terre sucrées: ressources et utilisation, 1960-1986 213
151. Total pommes de terre: ressources et utilisation, 1960-1986 214

V.7. Produits des animaux

152. Porc: ressources et utilisation, 1960-1987 217
153. Boeuf: ressources et utilisation, 1960-1987 218
154. Veau: ressources et utilisation, 1960-1987 219
155. Mouton et agneau: ressources et utilisation, 1960-1987 220
156. Abats: ressources et utilisation, 1960-1987 221
157. Viandes totales: ressources et utilisation, 1960-1987 222
158. Oeufs: ressources et utilisation, 1960-1987 223
159. Poulet: ressources et utilisation, 1963-1987 224
160. Poule: ressources et utilisation, 1963-1987 225
161. Dinde: ressources et utilisation, 1960-1987 226
162. Viande de volaille: disparition par personne, 1960-1987 227
163. Poissons et crustacés, frais et congelés: ressources et utilisation, 1960-1985 228
164. Poissons et crustacés, traites (fumés, salés, marinés): ressources et utilisation, 1960-1984 229
165. Poissons et crustacés, en conserve: ressources et utilisation, 1960-1985 230
166. Poissons d'eau douce: ressources et utilisation, 1960-1984 231
167. Total poissons et crustacés: ressources et utilisation, 1960-1984 232
168. Fromage cheddar: ressources et utilisation, 1960-1987 233
169. Fromage fondu: ressources et utilisation, 1960-1987 234
170. Fromages de spécialité: ressources et utilisation, 1960-1987 235
171. Fromage cottage: ressources et utilisation, 1960-1987 236
172. Poudre de lait écrémé: ressources et utilisation, 1960-1987 237
173. Lait entier évaporé: ressources et utilisation, 1960-1987 238
174. Lait entier condensé: ressources et utilisation, 1960-1987 239
175. Crème glacée: ressources et utilisation, 1960-1987 240
176. Lait homogénéisé (3,5%): ressources et utilisation, 1960-1987 241
177. Lait partiellement écrémé (2%): ressources et utilisation, 1961-1987 242

Page

178. Lait écrémé liquide: ressources et utilisation, 1960-1987 243
179. Lait partiellement écrémé chocolaté: ressources et utilisation, 1960-1987 244
180. Yogourt: ressources et utilisation, 1960-1987 245

V.9. Breuvages

181. Thé: ressources et utilisation, 1960-1987 249
182. Café: ressources et utilisation, 1960-1987 250
183. Cacao: ressources et utilisation, 1960-1987 251
184. Ventes totales des boissons alcooliques, 1960-1987 252
185. Boissons gazeuses: ressources et utilisation, 1974-1987 253

VI. Transformation et vente au détail des aliments et boissons

186. Indices des prix des produits industriels – Canada, 1981-1987 257
187. Valeur des livraisons de l'ensemble des industries manufacturieres et du secteur de la transformation des aliments et des boissons, dollars courants et dollars constants (1981), Canada, 1982-1987 259
188. Ventes d'aliments par type de magasin et par affiliation, 1972-1987 261
189. Marge bénéficiaire des sociétés de la transformation des aliments et boissons, 1972-1985 262
190. Rémuneration de l'actif des sociétés de la transformation des aliments et boissons, 1972-1985 263
191. Avoir propre/capital investi des sociétés de la transformation des aliments et boissons, 1972-1985 264
192. Remuneration du capital des sociétés de la transformation des aliments et boissons, 1972-1985 265
193. Coût des traitements et salaires par rapport aux frais totaux des sociétés de la transformation des aliments et boissons, 1972-1985 266
194. Coût des matières premières par rapport aux frais totaux des sociétés de la transformation des aliments et boissons, 1972-1985 267

VII. Divers tableaux sur les États-Unis

195. Dépenses alimentaires en tant que pourcentage du revenu disponible, É.-U., 1960-1987 271

[a] For the years 1947-1950 inclusive, data for the Yukon and Northwest Territories are included with those for British Columbia. Excludes personal disposable income of Canadians temporarily abroad.

De 1947 à 1950 inclusivement, les données relatives au Yukon et aux Territoires du Nord-Ouest ont été inclues dans celles de la Colombie-Britannique. Revenu personnel disponible des canadiens se trouvant temporairement à l'étranger est exclus.

[b] Taxes and other transfers paid by Canadians temporarily abroad, with the exception of employer and employee contributions to public service pensions for 1951 and on, cannot be estimated separately, and are included in the provincial estimates.

À partir de 1951 les impôts et les autres transferts provenant des Canadiens se trouvant temporairement à l'étranger, à l'exception des cotisants des employeurs et des employés au régime de pension de la fonction publique, ne pouvant être évalués indépendamment, ont été compris dans les estimations provinciales.

[a] The implicit indexes are currently weighted price indexes. They reflect not only price changes, but also changing expenditure patterns within and between major groups. They are derived by dividing the total in current dollars by the total in constant dollars.
Ces indices implicites sont des indices de prix à pondération courante. Ils reflètent non seulement des variations de prix, mais aussi les changements dans la structure des dépenses au sein des principaux groupes et entre ces derniers. L'indice implicite des prix utilisé pour la dépense nationale brute s'obtient en divisant le total en dollars courants par le total en dollars constants.

IV

RETAIL FOOD PRICE INDEXES

INDICES DES PRIX DES ALIMENTS AU DÉTAIL

Source: Consumer price indexes of food products were obtained from the Statistics Canada CANSIM database in May 1988, unless otherwise specified. This data is also contained in Statistics Canada Catalogue No. 62-010, *Prices and Price Indexes.*

L'indice des prix à la consommation des aliments provient de la Banque de données à Cansim de Statistique Canada de mai 1988, sauf avis contraire. Ces données se trouvent également dans la publication nº 62-010 de Statistique Canada, *Prix à la consommation des indices des prix.*

SUPPLY AND DISPOSITION

RESSOURCES ET UTILISATION

Source: Supply and disposition quantities were obtained from the Statistics Canada Cansim Cross-Classified database in June 1988. This data is also contained in Statistics Canada Catalogue No. 32-229 and 32-230, *Apparent Per Capita Food Consumption in Canada*.

Les données sur l'offre et la demande proviennent de la Banque de données à classification hétérogène Cansim de Statistique Canada de juin 1988. Ces données se trouvent également dans les publications nos 32-229 et 32-230, *Consommation apparente des aliments par personne au Canada*.

[a] The waste data also include potatoes used for feed.
Les données pour la perte comprend aussi les pommes de terre utilisées comme aliments pour animaux.

[b] Processed potato imports have been converted to fresh equivalent weight.
Les importations de pommes de terre transormées ont été converties à leur équivalent en légumes frais.

[a] The waste data also include potatoes used for feed.
Les données pour la perte comprend aussi les pommes de terre utilisées comme aliments pour animaux.

[b] Processed potato imports have been converted to fresh equivalent weight.
Les importations de pommes de terre transormées ont été converties à leur équivalent en légumes frais.

[a] Food purchases from grocery stores and other retail outlets, including purchases with food stamps and food produced and consumed on farms because the value of these foods is included in personal income. Excludes government donated foods.
Comprend les aliments achetés aux magasins d'épicérie et aux autres magasins de détail, ainsi que les achats utilisant des tickets d'alimentation, et les aliments produits et consommés à la ferme car la valeur de ces produits est inclue dans le revenu personnel. Ne comprend pas les aliments, donnés par le gouvernement.

[b] Purchases of meals and snacks by families and individuals, and food furnished to employees since it is included in personal income. Excludes food paid for by government and business, such as donated foods to schools, meals in prisons and other institutions, and expense-account meals.
Comprend les repas et les casses-croûtes des familles et des individus et les repas fournis aux employés car ces repas sont inclus dans le revenu personnel. Ne comprend pas les aliments distribués par des agences gouvernementales ou des compagnies d'affaires, comme les aliments donnés aux écoles, les repas dans les prisons et autres institutions, et les dépenses d'affaires. Total may not add due to rounding. Les totaux ne correspondent pas nécessairement par suite de l'arrondissement des chiffres.

[a] Quantity in pounds, retail weight unless otherwise shown.
A moins de spécifications contraires le poids en livre représente le poids au détail.

[b] Carcass weight
Poids abattu

[c] Edible weight
Poids comestible

[d] Ready-to-cook
Prêt à cuire

[e] Milk equivalent
Equivalent – lait

[f] Product weight
Poids de produit

[g] Total fat content
Contenu en gras total

[h] Actual weight
Poids réel

[i] Includes asparagus, broccoli, carrots, cauliflower, celery, sweet corn, lettuce, onions and tomatoes.
Comprend les asperges, le brocoli, les carottes, le chou-fleur, le maïs-sucré, la laitue, les oignons et les tomates.

[j] Fresh equivalent
Equivalent frais

[k] Includes white, whole wheat, semolina and durum flour.
Comprend la farine blanche, la farine de blé entier, la farine de semoule et la farine durum.

[l] Refined. Beginning in 1981, includes small amount of refined sugar contained in imported blends and mixtures, including sucrose-dextrose blends, sugar-sweetened tea mixes, and pancake syrups.
Raffiné. A partir de 1981, comprend les petites quantités de sucre raffiné contenues dans les importations de mélanges et de préparations, incluant les mélanges de sucrose-dextrose, les préparations de thé sucré, le sirop.

[m] Dry weight
Poids sec

NOTES AND DEFINITIONS

NOTES ET DÉFINITIONS

SECTION I

Population

Table 1:

For population census purposes, each person was counted in the locality of his regular domicile rather than the place where he happened to be staying at the census date i.e., midnight May 31 - June 1.

Estimates for non-census years were obtained by adding births and immigration and deducting deaths and an estimate of immigration from the census population count. Family allowance statistics were used to etimate interprovincial migration.

SECTION II

Income and Food Expenditures

Tables 2-13:

GROSS DOMESTIC PRODUCT (GDP) – This concept measures the total value of goods and servies at market prices produced in Canada using the factors of production of both Canadians and non-Canadians. For a more detail explanation refer to *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

PERSONAL EXPENDITURE ON CONSUMER GOODS AND SERVICES – Includes personal outlays for durable goods, non-durable goods, semi-durable goods and services. The estimates include implied expenditures out of income-in-kind such as food grown and consumed on the farm and imputed rents on owner-occupied housing. Expenditures of Canadian residents temporarily abroad (e.g., tourists and members of armed forces) are included while expenditure of foreign residents temporarily in Canada are excluded. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

PERSONAL INCOME – Includes all forms of income received by persons and unincorporated businesses; (1) wages, salaries and supplementary labor income; (2) military pay and allowances; (3) net income of non-farm business including rent; (4) net income of farm operators from farm production; (5) interest, dividends and miscellaneous investment income; and (6) transfer payment income from government from corporations and from non-residents. *National income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

PERSONAL DISPOSABLE INCOME – Personal income (defined above) minus direct taxes and other current transfers to government. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549

PERSONAL NET SAVINGS – Personal disposable income (defined above) minus personal expenditure on goods and services, current transfers to corporation and current transfers to non-residents. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

CURRENT DOLLARS – Prices of the current period are used to value quantities.

CONSTANT DOLLARS – Quantities are measured in current prices and then re-priced to the base period (1971).

IMPLICIT PRICE INDEXES – The implicit price indexes of Gross National Expenditure and its components, which are given in Table 15, are essentially a by-product to the deflation process. The overall implicit price index of Gross National Product is a comprehensive indicator available in Canada for measuring price change, since it covers the entire range of goods and services produced and sold in the economy. It is used as a measure of price change taking place in the economy as a whole.

These implicit indexes are currently weighted price indexes. They reflect not only price changes, but also changing expenditure patterns within and between major groups. They are derived by dividing the total in current dollars by the total in constant dollars. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

SECTION III

Family Expenditures

Tables 14-20:

The data in these tables are based on a stratified clustered sample drawn from the Labor Force Area sample for selected census metropolitan areas.

Excluded from the tables are: (1) family units of official representatives of foreign countries living in Canada; (2) families living in collective households such as hospitals and military establishments; (3) inmates living full time in institutions; (4) part-year spending units composed of families who had immigrated to Canada during the survey year; (5) units formed by marriage during the year of persons who had both been members of existing spending units, and (6) families who became independent spending units.

For detailed tables on average expenditure as well as an explanation of its components, please refer to *Urban Family Expenditure, 1972*, Cat. No. 62-541, *Introduction*.

TABLE 14: The data in this table are based on a stratified clustered sample drawn from the Labor Force Area sample for 14 census metropolitan areas; St. John's, Halifax, Saint John, Quebec, Montreal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vancouver.

TABLE 15: Although the fourteen cities of the 1974 survey were covered in the 1969 survey, they were not identified as a specific group. To facilitate comparison between the 1969 and the 1974 data, Statistics Canada made available selective tables. See *Urban Family Food Expenditure 1974*, Cat. No. 62-542.

TABLE 16: This survey was confined to eight major cities; St. John's, Halifax, Montreal, Ottawa, Toronto, Winnipeg, Edmonton and Vancouver. See *Urban Family Food Expenditure 1976*, Cat. No. 62-545.

TABLE 17. The *1978 Urban Family Food Expenditure Survey* was carried in 16 cities across Canada; St. John's, Charlottetown, Summerside, Saint John, Halifax, Quebec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vanvouver. See *Urban Family Food Expenditure 1978*, Cat. No. 62-548.

TABLE 18: The *1982 Family Food Expenditure Survey* was carried in 16 cities across Canada; St. John's, Charlottetown, Summerside, Saint John, Halifax, Quebec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vanvouver. See *Family Food Expenditure in Canada, 1982*, Cat. No. 62-554.

TABLE 19: The *1984 Family Food Expenditure Survey* was carried in 17 cities across Canada; St. John's, Charlottetown, Summerside, Saint John, Halifax, Quebec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vanvouver and Victoria. See *Family Food Expenditure in Canada, 1984, Selected Cities*, Cat. No. 62-554.

TABLE 20: The *1986 Family Food Expendi-ture Survey* was carried in 17 cities across Canada; St. John's, Charlottetown, Summerside, Saint John, Halifax, Quebec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vanvouver and Victoria. See *Family Food Expenditure in Canada, 1986, Selected Cities*, Cat. No. 62-554.

INCOME – Includes: gross income from wages and salaries; net income before taxes from self-employment; receipts from military pay and allowances; gross receipts from roomers and boarders; net rental; family allowances; interest and dividends; all pensions; workmen's compensation and unemployment insurance benefits; regular receipts from insurance policies and annuities; and miscellaneous regular income receipts. *Urban Family Expenditure 1972*, Statistics Canada, Cat. No. 62-541, p.xvii.

INCOME QUINTILE – Refer to the division of family units into five categories of income. The first fifth consists of the family units with the lowest incomes, the second fifth the second lowest incomes, etc.

FAMILY – The family or spending unit is defined as a group of persons dependent on a common or pooled income for the major items of expense and living in the same dwelling, or one financially independent individual living alone. Never married sons or daughters living with their parents are considered as part of their parents' spending unit. In the great majority of cases, the members of spending units of two or more are related by blood, marriage or adoption, and are thus consistent with the "economic family" definition employed in surveys of family income, "a group of individuals sharing a common dwelling unit and related by blood marriage or adoption." The definition of a family employed by the population census restricts the family to husband, wife and any unmarried children living with them, or one parent and unmarried children. Individual or one-person

spending units are financially independent persons living alone or as roomers. *Urban Family Expenditure 1972*, Statistics Canada, Cat. No. 62-541, pp. xv-xvi.

UNATTACHED INDIVIDUALS – Persons living alone or rooming in a household where they are not related to other household members. *Family Expenditure in Canada*, Statistics Canada, Cat. No. 62-535, Vol. 1, p.7.

WEIGHTED NUMBER OF FAMILIES – These are aggregates of the figures used in the weighting or records in each class and should be used in combining classes. *Urban Family Expenditure 1972*, Statistics Canada, Cat. No. 62-541, p. xvii.

SECTION IV

Retail Food Indexes

Tables 21-42:

CONSUMER PRICE INDEX – The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specific time period. The CPI is expressed in terms of 1981 = 100. As of January 1983, retail price indexes are based on 1978 expenditure patterns and are linked to their predecessor at March 1982. *The Consumer Price Index Reference Paper, Updating Based on 1982 Expenditures*. Statistics Canada, Cat. No. 62-553, occasional, Ottawa, February 1985.

SECTION V

Supply and Disposition

Tables 43-185:

These tables present the balance sheet showing the supply and disposition of each food item. To obtain gross supply, imports and beginning stocks are added to production estimates. This figure minus exports and ending stocks produces net supply. Fresh and frozen food stock statistics are based on quantities held in cold storage and wholesale warehouses. Stocks of other manufactured goods represent inventories held at the plant level.

The approximate amount of food available for human consumption is found by subtracting seed requirements, manufacturing inputs, livestock feed and waste where applicable from the net food supply.

The data for the components of the food balance sheets are mainly derived from farm surveys and reports by firms engaged in producing and marketing in the food industry. The net food figure represents the supply of food leaving the wholesale level destined for retail distribution.

The waste factors used for specific commodities attempt to account for waste up to the retail level but do not allow for losses in stores, households, private institutions or restaurants.

Per capita values do not represent total food supplies actually consumed by an individual or specific group of individuals but provide data on what is available for consumption on the average by the total Canadian population on July 1.

The measurement of per capita retail weight values in other forms such as sugar content, fresh equivalent weight, and milk solids involves the use of average conversion factors.

The most current and up-to-date supply and disappearance data were retrieved in June 1988 from the Cansim Cross-Classified System. Cansim is a Statistics Canada computerized data bank.

SECTION VI

Food and beverage processing and retailing

Tables 186-194:

TABLE 186: INDUSTRIAL PRODUCT PRICE INDEXES (IPPI) – These indexes are designed to measure the price change for products sold by domestic Canadian manufacturers. The current indexes are based on 1981 = 100 and are available from January 1981. They succeed an earlier set of data, known as Industrial Selling Price Indexes (ISPI), which were calculated on a base of 1971 = 100 and ended in December 1985. More complete information on the IPPI and potential linkages with the earlier ISPI's may be found in Statistics Canada, *Industrial Product Price Indexes, 1981 = 100, Concepts and Methods*, (Cat. No. 62-556).

TABLE 187: MANUFACTURING SHIPMENTS – Statistics Canada estimates monthly projections of annual Census of Manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The benchmark years for these data are adjusted from time to time by Statistics Canada; currently they are benchmarked to 1984 and 1985 Census data. Since the monthly estimates subsequent to 1985 are projections, these totals are subject to adjustment when more recent Census data become available. Constant dollar shipments have been calculated by deflating the published current dollar series by the Industry Product Price Index for the corresponding industry. Additional information on these data may be found in Statistics Canada, *Inventories, shipments and orders in manufacturing industries*, (Cat. No. 31-001), monthly.

TABLE 188: RETAIL SALES – Statistics Canada estimates monthly retail trade data from a survey of "retail trade locations". Estimates of retail trade are classified into one of 27 kind-of-business groupings. Combination stores are retail food stores that sell 20% or more fresh meat. Grocery, confectionery and sundries stores are retail food stores that sell 20% or less fresh meat. All other food stores include specialty food stores such as bakery stores, confectionery and nut stores, dairy product stores, egg and poultry stores, fruit and vegetable stores, meat markets, fish markets, delicatessen stores and all other food stores. Department store sales are disaggregated into several categories. The sales reported here are sales by food departments of department stores. A chain store organization is defined as an organization operating four or more retail outlets in the same kind of business under the same legal ownership. Any firm not meeting the above definition is classified as an independent organization. Additional information on these data may be found in Statistics Canada, *Retail Trade*, (Cat. No. 63-005), monthly and *Department Store Sales and Stocks*, (Cat. No. 63-002), monthly.

TABLES 189-194: CORPORATION FINANCIAL STATISTICS – The data underlying these financial ratios are published by Statistics Canada. They are primarily derived from corporation income tax returns submitted to Revenue Canada, Taxation. The statistical unit for this publication is the corporation as a legal entity. Corporations are classified to industries based on the 1960 Standard Industrial Classification. A corporation is classified in its entirety to a single SIC even, if as is the case with many of the largest corporations, it is engaged in a variety of industrial activities. Additional detail on these data may be found in the technical notes of Statistics Canada, *Corporation Financial Statistics*, (Cat. No. 61-207), annual.

NET PROFIT MARGIN RATIO – This ratio is calculated as net profit (loss) before taxes and extraordinary items as a percentage of revenue from the sales of products.

RETURN ON ASSETS – This is calculated as the profit (loss) after taxes and extraordinary items plus total interest expenses as a percentage of total assets.

EQUITY TO INVESTED CAPITAL – This is the ratio of total equity to invested capital. Invested capital is calculated as the sum of total equity plus long term debt less the portion of long term debt that is payable within one year.

RETURN ON EQUITY – This is calculated as profit (loss) after taxes and extraordinary items as a percentage of total equity.

COST OF SALARIES AND WAGES TO TOTAL EXPENSES – This is calculated as the expenses of wages and salaries as a percentage of total expenses. Wages and salaries include total salaries, wages, fees and bonuses paid to employees, officers and directors of the corporation. Employee benefits, such as group insurance, pensions, workmen's compensation, unemployment insurance and commissions paid to other companies are not included here, but are shown in "other expenses". Total expenses include materials, wages and salaries, repairs and maintenance, rent (real estate and other), royalties, bond interest, mortgage interest, other interest, taxes other than direct taxes, depreciation, depletion and amortization, and other expenses.

COST OF MATERIALS TO TOTAL EXPENSES – This is calculated as expenses on materials as a percentage of total expenses. Expenses on materials usually represent the cost of raw materials used in manufacturing. This figure may also be calculated as a derived residual and

represent the cost of sales less direct and indirect labor costs and overhead costs such as building repairs, depreciation and property taxes. Total expenses are the same as those defined above.

PRIVATE FINAL CONSUMPTION - Under the present System of National Accounts (SNA) this now includes certain fees (such as for driving licences or passports) paid by non-profit institutions serving households, nominal fees paid by individuals for government services, and the consumption of fixed capital of certain kinds of non-profit institutions (e.g., political parties, sports clubs) in respect of machinery and equipment. Excluded are payments by households of fees and duties imposed by government to raise revenue, final consumption expenditure and purchases of machinery and equipment by non-profit institutions serving households or public authorities, and – an important item – bank service charges imputed to households. *National Accounts of OECD Countries*, Vol. II, p. 364, 1974.

SECTION VII

Selected tables for the United States

Tables 195-198:

PERSONAL INCOME – Personal Income is the current income received by persons from all sources, inclusive of transfers from government and business but exclusive of transfers among persons. Not only individuals (including owners of unincorporated enterprises), but non-profit institutions, private trust funds, and private health and welfare funds are classified as "persons". Personal income is measured on a before-tax basis as the sum of wage and salary disbursements, other labor income, proprietors' and rental income, interest and dividends, and transfer payments, minus personal contributions for social insurance. *The National Income and Product Accounts of the United States*, 1929-1965, Statistics Tables, U.S. Department of Commerce p.viii.

The concept of personal income in Canada is slightly different from that in the United States. In Canada, employer and employee contributions to social insurance and government pension funds are included as a part of personal income on the income side, and are regarded as a part of current transfer to government (taxes) on the outlay side of the persons and unincorporated business account.

In the United States, employer and employee contributions to social insurance and government pension funds are not included in personal income, and are not therefore shown on the disposition side of the personal income and its disposition account. These differences in treatment affect the levels of personal income between the two countries, but they do not affect the estimates of disposable income, personal net saving, or the savings ratio (personal savings as a percentage of disposable income). *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549, p 332.

DISPOSABLE PERSONAL INCOME – Income remaining with persons after deductions of personal tax and non-tax payments to general government. It is the income available for spending or savings. *The National Income and Product Accounts of the United States, 1929-1985*, Statistics Tables, U.S. Department of Commerce, p. viii.

PERSONAL CONSUMPTION EXPENDITURES – Consists of the market value of purchases of goods and services by persons and non-profit institutions and the value of food, clothing, housing, and financial services received by them as income-in-kind. It includes the rental value of owner-occupied houses but does not include purchases of dwellings which are classified as capital goods. *The National Income and Product Accounts of the United States, 1929-1985*, Statistics Tables, U.S. Department of Commerce, p. viii.

SECTION VIII

Selected Tables for the OECD and the World

Tables 199-208:

GROSS DOMESTIC PRODUCT – Gross domestic product (GDP) measures the value of production arising within the geographical boundaries of a country irrespective of weather the factors of production involved are resident or non-resident. The GNP is designed to measure the production of the nation's residents only and

to exclude the production of non-resident factors of production. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549, pp. 91-92.

TABLE 207: It should be emphasized that exchange rates used to convert national currencies into U.S. dollars do not necessarily reflect the relations between the internal purchasing powers of currencies in the various countries. Exchange rates can be affected by many factors unrelated to internal price levels including international flows of capital and temporary swings in current account balances brought about by demand management policies or various types of controls. In addition, in most countries, that part of production which is traded internationally represents only a small-sometimes a very small-part of Gross National Product so that the exchange rate is applicable only to a part of the country's total economic production. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549, p. 330.

PRIVATE FINAL CONSUMPTION – Under the present System of National Accounts (SNA) this now includes certain fees (such as for driving licences or passports) paid by non-profit institutions serving households, nominal fees paid by individuals for government services, and the consumption of fixed capital of certain kinds of non-profit institutions (e.g., political parties, sports clubs) in respect of machinery and equipment. Excluded are payments by households of fees and duties imposed by government to raise revenue, final consumption expenditure and purchases of machinery and equipment by non-profit institutions serving households or public authorities, and - an important item – bank service charges imputed to households. *National Accounts of OECD Countries*, Vol. II, p. 364, 1974.

SECTION I
Population

Tableaux 1:

Aux fins du recensement de la population, chaque personne a été recensée dans la localité de son domicile habituel, plutôt qu'à l'endroit où elle se trouvait le jour du recense-ment, c'est-à-dire à minuit entre le 31 mai et le 1er juin.

Les estimations pour les années autres que celles de recensement ont été obtenues en additionnant le nombre de naissances et le nombre d'immigrés et en soustrayant le nombre de décès et une estimation du nombre d'émigrés. Les statistiques sur les allocations familiales ont été utilisées pour établir une estimation de la migration entre les provinces.

SECTION II
Revenus et dépenses alimentaires

Tableaux 2-13:

PRODUIT INTERIEUR BRUT (P.I.B.) – Une mesure de la valeur totale des biens et services du pays aux prix du marché fondée sur les facteurs de production du Canada et d'ailleurs. Pour de plus amples détails, consulter: *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

DEPENSES PERSONNELLES EN BIENS ET SERVICES DE CONSOMMATION – Comprennent les dépenses personnelles en biens durables, non durables, semi-durables et services. Les estimations englobent les dépenses implicites à même le revenu en nature (denrées alimentaires produites et consommées dans les fermes de loyers imputés ou fictifs à l'égard des résidents canadiens qui séjournent temporairement à l'étranger (par exemple, les touristes et les membres des forces armées) sont comprises, mais non les dépenses des résidents étrangers séjournant temporairement au Canada. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

REVENU PERSONNEL – Comprend tous les genres de revenus en espèces des particuliers et des entreprises non constituées; (1) traitements, salaires et revenu supplémentaire du travail; (2) soldes et indemnités militaires; (3) revenu net provenant d'une entreprise non agricole y compris le revenu de loyers; (4) revenu net provenant de l'exploitation agricole; (5) intérêts, dividendes et divers revenus de placements; et (6) revenus de transferts du gouvernement, des compagnies et des non résidents. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

REVENU PERSONNEL DISPONIBLE – Le revenu personnel (défini ci-dessus) moins les impôts directs et autres transferts courants du gouvernement. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

EPARGNE PERSONNELLE NETTE – Le revenu personnel disponible (défini ci-dessus) moins les dépenses personnelles en biens de consommation et de services, transferts courants aux corporations et transferts courants aux non résidents. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

DOLLARS COURANTS – Les prix de la période courante sont utilisés pour évaluer les quantités.

DOLLARS CONSTANTS – Les quantités sont évaluées à partir des prix courants et réévaluées ensuite en fonction de la période de base (1971).

INDICES IMPLICITES DES PRIX – Les indices implicites des prix de la Dépense nationale brute et de ses composantes présentés au tableau 15 sont essentiellement des sous-produits de la déflation. L'indice implicite des prix général du Produit national brut est le plus complet de tous les indicateurs existant au Canada pour la mesure des variations des prix, puisqu'il vise tous les biens et services produits et vendus sur le marché. il sert donc de mesure de la variation des prix dans l'économie considérée dans son ensemble.

Les indices implicites des prix sont des indices de prix à pondération courante qui traduisent non seulement la variation de prix, mais aussi les changements dans le régime de dépenses du groupe visé. On les obtient en divisant le total en dollars courants par le total en dollars constants. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

SECTION III

Dépenses des familles

Tableaux 14-20:

Les données de ces tableaux sont fondées sur un échantillon stratifié et groupé, tiré de l'échantillon aréolaire de la population active de huit régions métropolitaines de recensement: Saint-Jean (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Edmonton et Vancouver.

Sont exclus des tableaux: (1) les unités familiales des fonctionnaires étrangers établis au Canada; (2) les familles vivant en ménages collectifs comme les hôpitaux et les établissements militaires; (3) les pensionnaires vivant à plein temps dans des établissements; (4) les unités de dépense pour une partie de l'année comprenant des familles qui ont immigré au Canada au cours de l'année visée par l'enquête; (5) les unités formées par des mariages, au cours de l'année, de personnes qui étaient toutes deux membres d'unités de dépenses déjà existantes; et (6) les familles qui sont devenues des unités de dépenses indépendantes.

Pour des tableaux détaillés sur la dépense moyenne ainsi qu'une explication de ses éléments, consulter la publication *Dépenses des familles urbaines 1972*, Statistique Canada, nº de catalogue 62-541, Introduction.

TABLEAU 14: Les données de ce tableau sont fondées sur un échantillon stratifié et groupé, tiré de l'échantillon aréolaire de la population active de quatorze régions métropolitaines: Saint-Jean (T.-N.), Halifax, Saint-Jean (N.-B.), Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton et Vancouver.

TABLEAU 15. Bien que les quatorze villes couvertes par l'enquête de 1974 étaient incluses dans celles de 1969, elles ne constituaient pas un groupe spécifique. Pour permettre la comparaison entre les deux enquêtes, Statistique Canada a produit des tableaux spéciaux. *Dépenses alimentaires des familles urbaines, 1974*, nº de catalogue 62-542, juin 1977.

TABLEAU 16: Cette enquête n'a couvert que huit grandes villes: Saint-Jean (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Edmonton et Vancouver, *Dépenses alimentaires des familles urbaines, 1976*, nº de catalogue 62-545, avril 1978.

TABLEAU 17: L'enquête de 1978 sur les dépenses alimentaires des familles urbaines, a été réalisée dans 16 villes d'un bout à l'autre du Canada: St. John's, Charlottetown, Summerside, Saint John, Halifax, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton et Vancouver. *Dépenses alimentaires des familles urbaines, 1978*, nº de catalogue 62-548, Ottawa, 1980.

TABLEAU 18: L'enquête de 1982 sur les dépenses alimentaires des familles urbaines, a été réalisée dans 16 villes d'un bout à l'autre du Canada: St. John's, Charlottetown, Summerside, Saint John, Halifax, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton et Vancouver. *Dépenses alimentaires des familles urbaines au Canada, 1982*, nº de catalogue 62-554, Ottawa, 1984.

TABLEAU 19: L'enquête de 1984 sur les dépenses alimentaires des familles urbaines, a été réalisée dans 17 villes d'un bout à l'autre du Canada: St. John's, Charlottetown, Summerside, Saint John, Halifax, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver et Victoria. *Dépenses alimentaires des familles urbaines au Canada, villes choisies, 1984*, nº de catalogue 62-554, Ottawa, 1986.

TABLEAU 20: L'enquête de 1986 sur les dépenses alimentaires des familles urbaines, a été réalisée dans 17 villes d'un bout à l'autre du Canada: St. John's, Charlottetown, Summerside, Saint John, Halifax, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver et Victoria. *Dépenses alimentaires des familles urbaines au Canada, villes choisies, 1986*, nº de catalogue 62-554, Ottawa, 1988.

REVENU – Sont inclus: le revenu brut tiré des traitements et salaires; le revenu net avant déduction fiscale, tiré de l'emploi indépendant; les recettes découlant de la solde et des allocations militaires; les recettes brutes tirées

de «chambreurs» et des pensionnaires; le montant net des loyers; les allocations familiales; l'intérêt et les dividendes; toutes les pensions; les indemnités d'accident du travail; les recettes habituelles tirées de polices d'assurance et des rentes; et les diverses recettes touchant le revenu habituel. *Dépenses des familles urbaines, 1972*, Statistique Canada, nº de catalogue 62-541, p. xvii.

QUINTILES DE REVENU – Les quintiles représentent la division des unités familiales en cinq catégories de revenu. Le premier quintile est constitué des familles à plus bas revenu, le deuxième, du deuxième plus bas et ainsi de suite.

FAMILLE – La famille ou unité de dépense est un groupe de personnes qui dépendent d'un revenu commun ou mis en commun pour les principaux postes de dépense et qui demeurent dans la même habitation, ou un particulier financièrement indépendant vivant seul. On considère les fils ou filles célibataires qui demeurent avec leurs parents comme faisant partie de l'unité de dépense de leurs parents. Dans la plupart des cas, les membres des unités de dépense comprenant deux personnes ou plus sont apparentés par les liens du sang, du mariage ou de l'adoption et, de ce fait, répondent à la définition de la «famille économique» employée dans les enquêtes sur les revenu familial: «groupe de pars de dépense comprenant deux personnes ou plus sont apparentés par les liens du sang, du mariage ou de l'adoption» et, de ce fait, répondent à la définition de la «famille économique» employée dans les enquêtes sur les revenu familial: «groupe de particuliers apparentés par le liens du sang, du mariage ou de l'adoption et qui partagent une habitation commune.» La définition de la famille selon le recensement de la population limite la famille à l'époux, l'épouse et tout enfant non marié. Les particuliers ou unités de dépense d'une seule personne sont des personnes financièrement indépendantes qui vivent seules ou en qualité de chambreurs. *Dépenses des familles urbaines, 1972*, Statistique Canada, nº de catalogue 62-541, p. xv-xvi.

PERSONNES SEULES – Personnes vivant seules ou qui occupent une chambre dans un ménage avec lequel elles n'ont aucun lien de parenté. *Dépenses des familles au Canada*, Statistique Canada. vol. 1, nº de catalogue 62-535, Vol. 1, p. 7.

NOMBRE PONDERE DE FAMILLES – Il s'agit là d'aggrégats des chiffres utilisés pour la pondération des relevés de chaque classe; ces aggrégats devraient servir à la combinaison de classes. *Dépenses des familles urbaines, 1972*, Statistique Canada, nº de catalogue 62-541, p. xvii.

SECTION IV

L'indice des prix des aliments

Tableaux 21-42:

INDICE DES PRIX A LA CONSOMMATION – L'indice des prix à la consommation (IPC) mesure la variation en pourcentage dans le temps du coût à l'achat d'un «panier» fixe de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. L'IPC est exprimé sur la base 1981 = 100. Depuis janvier 1983, les indices des prix de détail sont fondés sur les dépenses de 1978 et sont raccordés aux indices précédents en mars 1982. *L'indice des prix à la consommation*, Statistique Canada, nº de catalogue 62-553, Ottawa, février 1985.

SECTION V

Ressources et utilisation

Tableaux 43-185:

Ces tableaux présentent le bilan annuel de les ressources et de l'utilisation de chaque produit alimentaire. Pour obtenir les ressources brutes, on ajoute les importations et les stocks initiaux aux estimations de la production. En soustrayant de ce chiffre les exportations et les stocks de fermeture, on obtient les ressources nettes. Les statistiques des stocks d'aliments frais et congelés sont fondées sur les quantités détenues en entreposage frigorifique et dans les entrepôts de gros. Les stocks des autres biens fabriqués représentent les stocks détenus à l'usine.

On obtient la quantité approximative d'aliments disponibles pour la consommation humaine en soustrayant des ressources alimentaires nettes, les semences requises, les aliments destinés à l'utilisation industrielle, les aliments pour animaux et le gaspillage, lorsqu'il y a lieu.

Les données sur les composantes des bilans alimentaires sont tirées surtout des enquêtes agricoles et des déclarations des entreprises qui s'adonnent à la production et la commercialisation dans l'industrie alimentaire. Le chiffre de la quantité nette d'aliments représente les ressources alimentaires qui partent du niveau de gros pour la distribution au détail.

Les facteurs de perte utilisés dans le cas de certains aliments visent à tenir compte de la perte qui se produit avant le niveau de détail, mais ne tiennent pas compte des pertes dans les magasins, les ménages, les institutions privées et les restaurants.

Les valeurs par personne ne représentent pas les ressources alimentaires totales effectivement consommées par une personne ou par un groupe de personnes en particulier, mais constituent des données sur ce qui est disponible à la consommation en moyenne pour la population totale du Canada au 1er juillet.

La mesure des valeurs par personne des poids de détails sous d'autres formes telles que le contenu en sucre, le poids de l'équivalent en produits frais et la teneur en matières solides du lait comporte l'utilisation de facteurs moyens de conversion.

Les données les plus courantes et plus récentes de l'approvisionnement et de l'utilisation ont été tirées de la base des données recoupées Cansim au mois de juin 1988. La base de données recoupées Cansim est une banque de données informatisée de Statistique Canada.

SECTION VI

Transformation et detail des aliments et boissons

Tableaux 186-194:

TABLEAU 186: INDICE DES PRIX DES PRODUITS INDUSTRIELS (IPPI) – Ces indices visent à mesurer les variations de prix des produits vendus par les fabricants du Canada. Les indices courants ont l'année 1981 comme année de référence et sont disponibles depuis janvier 1981. Ils prennent la suite des indices des prix de vente dans l'industrie (IPVI) qui avaient 1971 comme année de référence et qui se sont terminés en décembre 1985. On peut trouver plus de renseignements sur ces données dans Statistique Canada, *Indices des prix des produits industriels*, 1981 = 100, Concepts et méthodes, (no. au catalogue 62-556).

TABLEAU 187: LIVRAISONS MANUFACTURIERES – Statistique Canada estime des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données sont ajustées en fonction des recensements de 1984 et 1985. Parce que les données depuis 1985 sont des projections, elles seront ajustées quand les données du recensement des années suivantes seront publiées. Les livraisons en dollars constants ont été calculées par la déflation des données des livraisons en dollars courants avec l'indice des prix des produits industriels. On peut trouver plus de renseignements sur ces données dans Statistique Canada, *Stocks, livraisons et commandes des industries manufacturières*, (nº du catalogue 31-001), mensuel.

TABLEAU 188: VENTE AU DETAIL – Statistique Canada fait des estimations mensuelles de données du commerce de détail par une enquête des «points de vente au détail». Les estimations au commerce de détail sont classifiées selon 27 grands groupes de genre de commerce. Les épiceries – boucheries sont des détaillants d'aliments qui vendent plus de 20% de viande fraîche. Les épiceries, confiseries et magasins d'articles divers sont des détaillants d'aliments qui vendent moins de 20% de viande fraîche. Tous les autres magasins d'aliments incluent les magasins de produits de boulangerie, les magasins de bonbons, de noix et confiseries, les laiteries, les magasins d'oeufs et de volailles, les magasins de fruits et légumes, les boucheries, les poissoneries, les magasins d'aliments fins (delicatessen), et autres magasins d'alimentation. Les ventes des magasins à rayons sont classifiées selon plusieurs groupes. Les ventes dans ce tableau sont les ventes d'aliments par les magasins à rayons. Un magasin à succursales (chaine) est une entreprise exploitant au moins quatre points de vente au détail dans un même genre de commerce, sous une même appartenance juridique. Toute entreprise dont le schéma de structure ne concorde pas avec la définition ci-dessus est classée automatiquement dans la catégorie des magasins indépendants. Plus de renseignements peuvent être trouvés dans Statistique Canada, *Commerce de détail* (no. au Catalogue 63-005), mensuel et *Ventes et stocks des grands magasins* (nº au Catalogue 63-002), mensuel.

TABLEAUX 189-194: STATISTIQUE FINANCIERE DES SOCIETES – Les données nécessaires aux ratios financiers sont publiées par Statistique Canada. La plupart des données sont tirées des déclarations d'impôt sur les revenus des sociétés présentées à Revenu Canada, Impôt. L'unité statistique de cette publication est la société considérée comme personne morale. Les sociétés sont classifiées selon la classification type des industries de 1960. Une société est classée dans sa totalité à une seule activité économique même si, comme il arrive dans le cas de nombreuses grandes sociétés, elle s'adonne à plusieurs activités. On peut trouver plus de renseignements sur ces données dans les notes techniques de Statistique Canada, *Statistique financière des sociétés*, (nº du catalogue 61-207), annuel.

MARGE BENEFICIAIRE NETTE – Ce ratio est égale au pourcentage du bénéfice (perte) net avant impôts et revenus extraordinaires sur les revenus des ventes de produits.

REMUNERATION DE L'ACTIF – Ce ratio est égale au pourcentage du bénéfice (perte) net après impôts et revenus extraordinaires plus l'intérêt total sur le total des actifs.

AVOIR PROPRE/CAPITAL INVESTI – C'est le ratio de l'avoir propre total sur le capital investi. Le capital investi est la somme de l'avoir propre total et de la dette à long terme moins la portion de dette à long terme exigible durant l'année.

REMUNERATION DU CAPITAL – Ce ratio est égale au pourcentage du bénéfice (perte) net après impôts et revenus extraordinaires sur l'avoir propre total.

COUT DES TRAITEMENTS ET SALAIRES PAR RAPPORT AU FRAIS TOTAUX – C'est le pourcentage du coût des traitements et salaires sur les frais totaux. Les traitements et salaires incluent le total des dépenses au titre des jetons de présence, des traitements, salaires et gratifications des employés, des administrateurs et dirigeants de la société. Les charges sociales telles que les primes d'assurance collective et les contributions aux régimes de retraite, d'indemnisation des accidents du travail et d'assurance-chômage et commissions versées à d'autres sociétés ne figurent pas ici, mais sont regroupées avec les «autres frais». Les frais totaux renferment les matières premières, les traitements et salaires, l'entretien et la réparation, les loyers des biens immobiliers, les loyers (autres), les redevances, l'intérêt sur la dette obligatoire, l'intérêt sur la dette hypothècaire, les autres dépenses d'intérêt, l'amortissement, l'épuisement, et les autres frais.

COUT DES MATIERES PREMIERES PAR RAPPORT AU FRAIS TOTAUX – C'est le pourcentage du coût des matières premières sur les frais totaux. Normalement, le coût des matières premières est le coût des matières brutes utilisées dans la fabrication. Ce chiffre peut être obtenu indirectement, en retranchant du coût des marchandises vendues, les coûts directs et indirects de la main-d'oeuvre et les frais généraux tels que les réparations aux bâtiments, la dépréciation et les impôts fonciers. Les frais totaux sont les mêmes que ceux définis précédemment.

SECTION VII

Divers tableaux sur les États-Unis

Tableaux 195-198:

REVENU PERSONNEL – Le revenu personnel constitue le revenu courant reçu de toutes sources y compris les transferts du gouvernement et des entreprises, à l'exclusion des redistributions entre personnes. Sont classés comme personnes non seulement les individus (incluant les personnes à leur compte), mais aussi les associations à but non lucratif, les caisses de crédit, les caisses privées d'assurance santé et de bien-être social. Le revenu personnel est mesuré avant impôt par la somme des traitements et salaires, d'autres revenus du travail, revenu de biens immobiliers et de loyers, moins les intérêts et les dividendes et les paiements de transfert, moins les contributions personnelles à l'assurance sociale. *The National Income and Product Accounts of the United States, 1929-1985* (tableaux statistiques), *U.S. Department of Commerce*, p. viii.

Le concept de revenu personnel diffère légèrement entre le Canada et les États-Unis. Au Canada, les estimations des employeurs et des salariés aux caisses d'assurance sociale et aux régimes publics de pensions font partie du revenu personnel du côté des revenus, et elles sont considérées comme une partie des transferts courants aux administrations (impôts et taxes)

du côté des dépenses de la catégorie des particuliers et entreprises individuelles. Aux États-Unis ces mêmes cotisations ne sont pas prises en compte dans le revenu personnel et ne figurent donc pas du côté des emplois dans le compte du revenu personnel et de son emploi. Ces différences de traitement influent sur les niveaux du revenu personnel pour les deux pays. Elles n'ont cependant aucune incidence sur les estimations du revenu disponible et de l'épargne nette des particuliers ou sur le rapport entre l'épargne personnelle et le revenu disponible. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, no de catalogue 13-549, p. 366.

REVENU PERSONNEL DISPONIBLE – Revenu personnel après déduction des taxes et des transfers courants au gouvernement. C'est le revenu personnel, disponible à l'épargne et à la consommation. *The National Income and Product Accounts of the United States, 1929-1985* (tableaux statistiques), *U.S. Department of Commerce*, p. viii.

DEPENSES PERSONNELLES A LA CONSOMMATION – Comprend la valeur courante des biens et services représentant les achats de particuliers et d'institutions sans but lucratif, ainsi que la valeur des aliments, vêtements, logement et services de financement qu'ils reçoivent sous forme du revenu en espèces. Comprend la location mais exclut les achats de propriétés qui sont classées sous titre de biens-capitaux. *The National Income and Product Accounts of the United States, 1929-1965* (tableaux statistiques), *U.S. Department of Commerce*, p. viii.

SECTION VIII

Divers tableaux sur les pays de l'OCDE et le monde

Tableaux 199-208:

PRODUIT INTERIEUR BRUT – Le produit intérieur brut (PIB) mesure la valeur de la production à l'intérieur des limites géographiques du pays, sans égard au fait que les facteurs de production en question soient résidents ou non résidents. Le PNB vise à mesurer la production des résidents du pays seulement et laisse hors compte celle des facteurs de production étrangers. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549, p. 101.

TABLEAU 207: Il est à remarquer que les cours du change utilisés en vue de la conversion des devises des pays respectifs en dollars des Etats-Unis ne rendent pas nécessairement compte des relations sur le plan du pouvoir d'achat intérieur entre les devises de divers pays. De nombreux facteurs non reliés aux niveaux des prix intérieurs, dont les mouvements internationaux de capitaux et les revirements temporaires des soldes du compte courant suscités par les politiques de gestion de la demande ou par l'application de divers types de contrôles, peuvent influer sur les cours du change. De plus, dans la plupart des pays, la partie de la production qui est échangée sur les marchés internationaux ne représente qu'une petite, parfois une très petite partie du PNB, de sorte que le taux de change ne s'applique qu'à une partie seulement de l'ensemble de la production économique du pays. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549, p. 365.

CONSOMMATION FINALE PRIVEE – Suivant le Système de comptabilité nationale (S.C.N.) sont maintenant inceus dans ce poste certaines redevances (au titre des permis de conduire ou des passeports par exemple) acquittées par les institutions sans but lucratif au service des ménages, les paiements nominaux faits par les particuliers au titre de services rendus par les administrations publiques ainsi que la consommation de capital fixe, sous forme de machines et d'outillage, de certaines catégories d'institutions sans brut lucratif (partis politiques et clubs sportifs par exemple). Sont en revanche exclus de la consommation finale privée les paiements effectués par les ménages au titre de redevances et droits imposés par les administrations publiques pour se procurer des recettes, la consommation finale et les achats de machines et d'outillage des institutions sans but lucratif qui sont au service des ménages ou des administrations publiques et, ce qui est un élément important, les frais bancaires imputés aux ménages. *Comptes nationaux des pays de l'OCDE*, vol. II, p. 368, 1974.
